

DRUID SYNCHRONISATION MODULE

Synchronisation between energizers has traditionally been done by physically connecting the energizers through wiring. The ground breaking Nemtek synchronisation module now synchronises Druid dual zone energizers using satellites eliminating the need for wiring between energizers, saving on costs and making the installation quicker and easier.

Features:

- Easy to install and ready to use
- Watertight housing for external installation

Specifications:

Weight	105g
Power supply	10V – 15Vdc
Current consumption	50mA
IP rating	IP65
