

SOLID GALVANISED WIRE

Solid Galvanised Wire is ideal for long permanent electric fencing systems. The heavy galvanised high tensile strength wire is used where a long life and durable electric fence is required. It's ideal for the larger farm and game electric fencing systems.

Features:

- Heavy duty high tensile strength wire
- Long life expectancy on a fence
- Larger diameters offer lower electrical resistance
- Available in light galvanised for inland use and heavy galvanised for coastal areas

Specifications:

Material	High tensile steel
Construction	Solid
Tensile breaking strength	2.0mm: ~320kgs 2.24mm: ~400kgs
Resistance	2.0mm: 60 Ohms/km 2.24mm 50Ohms/km
Finish	Heavy galvanised Light galvanised
